

Web Developer

Profile

My point of view on collaborative projects and development:

I am an individual that strives for group success. I've learned that through team management from my retail and design/development experiences.

Because of my past work experiences, I have gained the abilities to problem-solve, communicate effectively, decision-making, be collaborative, and have a strong work ethic. Each was learned by team projects, development projects, and working with customers/clients.

Ultimately, I'm self-motivated that have the drive to learn and work with others.

Skills

As a front-end developer. I can develop clean and efficient web apps. While developing a project I can distinguish and flaws in the code by a complete analysis of the code.

I use front-end languages and technology such as:

- HTML
- CSS/SCSS
- Javascript
- APIs
- WordPress
- Photoshop
- InDesign
- XD
- Illustrator

Work Experience

Emerald Grove Puppies

September 2021 - December 2021

Student Project - Developer

In this position, I am responsible for ensuring that the development process goes smoothly as possible since I'm the only developer on a team of three. Utilizing great communication with the designers on my team to ensure that the design is presented properly on-screen and accomplishes the project's intended goals.

Zumiez

July 2017 - June 2020

Second Assistant Manager

In this position, I started as a Salesperson, responsible for: Respectfully engaging with Customers with clear communication, attentiveness, and patience to provide an exceptional sales experience and a desire to be a returning customer.

- Responsible for training the sales teams to give the best sales experience possible, resulting in a great experience for customers.
- Managing employees' day-to-day tasks, resulting in a productive team that achieved its goals throughout the day.
- Kept the store organized and prepared for presentation of merchandise, enabling customers to find exactly what they want. As a result I've learned how to provide wayfinding throughout the store.
- Made daily productivity decisions to achieve sales goals.
- Managed reconciling the till to maintain profitability, while securing the store's merchandise.
- Regularly performed product counts and audits to keep storage costs down, resulting in a well kept inventory.

Accomplishments:

- Increased the store's profit margin by 6.73%
- Top 500 in sales for the company
